**** See image for Certificate of Correction ****

TITLE: Recording medium for storing defect management information of recording real time data, defect managing method therefor, and real time data recording method

Detailed Description Text (21):

A determination of whether a defective region will be replaced by a block existing in a spare area using linear replacement is made by information associated with use or non-use of linear replacement defect management recorded in a defect management region on the entire disc or in a specific area of the disc regardless of the type of data to be recorded in a corresponding area.
